

## 2019 Index

This index was compiled to assist readers in finding information in the 2019 issues of *Automata Magazine*. It covers six issues, from January-February through November-December 2019. There are hundreds of entries, cross referenced by article title, author's name, and subject.

### Using the Index

Categories are delineated as follows:

**AUTHOR'S NAMES** are in capital letters. Below the author's name is a listing of his/her articles.

**Article titles** are in boldface type and are listed both under the author's name and alphabetically within the index.

Subject listings are entered in plain type, and may include subcategories.

**Special note:** There are two versions of the September-October 2019 issue available (Vol. 1, No. 5)—one with and one without erotic content. This index is based on the version *with* erotic content.

At the end of each listing you will find numbers, such as 1/3 47. The first number is the volume, the number after the slash is the issue number, and the last number is the page on which the article begins. Thus, the above example would read as volume one (2019), number three (May-June), page 47.

## Write an article!

Automata Magazine needs authors. If you're unsure about writing, check out the guidelines we've prepared:

<http://automatamagazine.com/write/>

Tell us about your projects, visits to places of automata interest, your collection, problems you have solved, or what-have-you. All skill levels are covered and you needn't be an expert or fine craftsman to write an interesting story about your work. Charm and concept are often as important as craftsmanship.
