

2020 Index

This index was compiled to assist readers in finding information in the 2020 issues of *Automata Magazine*. It covers six issues, from January-February through November-December 2020. There are hundreds of entries, cross referenced by article title, author's name, and subject.

Using the Index

Categories are delineated as follows:

AUTHOR'S NAMES are in capital letters. Below the author's name is a listing of his/her articles.

Article titles are in boldface type and are listed both under the author's name and alphabetically within the index.

Subject listings are entered in plain type, and may include subcategories.

At the end of each listing you will find numbers, such as 2/5 27. The first number is the volume, the number after the slash is the issue number, and the last number is the page on which the article begins. Thus, the above example would read as volume two (2020), number five (September-October), page 27.

Write an article!

Automata Magazine needs authors. Everyone has a unique story and we'd love to hear about it. Writing it down isn't as difficult as you might think. If you're unsure, check out the guidelines we've prepared: <http://automatamagazine.com/write/>

Tell us about your projects, visits to places of automata interest, your collection, problems you have solved, or what-have-you. This fascinating field of endeavor encompasses all skill levels, and you

don't have to be an expert or fine craftsman to write an interesting story about your work. With automata, charm and concept are often as important as craftsmanship (sometimes more so!).

And don't forget our Gallery. To be included, please send photos and descriptions of your projects.
