AUTOMATA MAGAZINE

2026 Index

This index was compiled to assist readers in finding information in the 2026 issues of *Automata Magazine*. It covers six issues, from January-February through November-December 2026. Entries are cross referenced by article title, author's name, and subject.

Using the Index

Categories are delineated as follows:

AUTHOR'S NAMES are in capital letters. Below the author's name is a listing of his/her articles.

Article titles are in boldface type and are listed both under the author's name and alphabetically within the index.

Subject listings are entered in plain type, and may include subcategories.

At the end of each listing are numbers, such as 8/3 47. The first number is the volume, the number after the slash is the issue number, and the last number is the page on which the article begins. Thus, the above example would read as volume eight (2026), number three (May-June), page 47.

Also, titles of automata are italicized.

A

a PART of the story
AI is a valuable part of my automata studio
Automata longevity
Part 2: Would you like your automata to last forever? 8/1 38
Part 3: A sticky business 8/2 41
